Experience

SANMINA — FORTUNE 500, GLOBAL ELECTRONICS MFG. SERVICES COMPANY **SANMINA®**

NEW PRODUCT INTRODUCTION (NPI) ENGINEER — AUSTIN, TX — MAY '16 - PRESENT

- ▶ Initiates and drives production development for all new customer products, organizing and leading meetings, communicating with the customer and overseeing product requirements over the lifecycle
- ▶ Negotiated with customer to allow shipment of \$93,000 worth of product they originally rejected
- ▶ Managed and led future business-dependent, high-visibility customer audits, acting as a sole point of contact to customer engineering upper management
- ▶ Devised and executed training program for 70+ employees, covering new technical requirements initiated by customer engineering

SELF — IOS DEVELOPMENT, SWIFT | [GITHUB](https://github.com) | NOV '15 - PRESENT

- ▶ ATXWeCycle App - helps people remember when to bring recycling to the curb
 - ▶ Utilized RESTful API calls to allow users to look up their address manually or via location services
 - ▶ Macro skillset: Architecture, Design, Promotion, QA (User feedback/testing), UI
- ▶ Volunteer iOS Developer — 3 Day Startup Global Roundup Hackathon Team (July '16)
- ▶ Self-taught developer - Completed 2 iOS textbooks with multiple projects therein

SWYSE — FOUNDER — P2P SHARING ECONOMY PLATFORM FOR POSSESSIONS | AUG '14 - AUG '16

- ▶ Founded startup centered around the modern consumer that eliminates the burden of having to purchase low use items by connecting people who have idle possessions to the individuals that want to briefly use them
- ▶ Bootstrapped, formulating digital strategy for the product — product marketing, user story mapping, lean startup, SWOT analysis, UX/UI, digital marketing, entrepreneurial mindset
- ▶ Collaborated with visual designer for app wireframe and branding — [case study](#) showing branding artboard and wireframing process

SANMINA — MANUFACTURING ENGINEER — JULY '13 - MAY '16

- ▶ Interfaced with customer engineers to resolve manufacturing issues & remove production roadblocks in a time-sensitive manner
- ▶ Managed multiple CAD/3D design projects while coordinating with tight production deadlines

EIEIO - FOODTECH STARTUP ACQUIRED BY WHITEWAVE FOODS — BRANDS:

MECHANICAL DESIGN ENGINEER — AUSTIN, TX — MAY '12 - JULY '13

- ▶ Solely ran the engineering department successfully with <1 year career experience
- ▶ Developed design of mass-produced components used in company's highest grossing products

Education

University of Central Florida — B.S. in Mechanical Engineering with Mathematics Minor
